to pass, as they journeyed from
the east, that they found a plain

they dwelt there. And they
said to one another, Go to, let us

brick for stone, and slime
they had for mortar.
Said Go to, let us build us a city

Behold, the people is one, and
they have all one

do: and now nothing will be
restrained of them, which they
have imagined to do. Go to, let us
down, and there confound their
language, that they may not
understand, that they may not

them abroad from thence

I keep thinking of Lucia, as I read this page with its conflicting, random voices. Here from Ellmann is Lucia to JJ, October 1934: "Father dear, I am very fond of you. Thanks for the pretty pen. Zurich is not the worst place in the world is it? Maybe one day you can come with me to the museum, Father. I think that you are spending a lot of money on me. Areopagus: The Brothers Grimm, Jacob (1785-1863) and Wilhelm (1786-1859), were German academics, philologists, cultural researchers, court lexicographers and authors who together specialized in collecting and publishing folklore. They popularized Cinderella, The Frog Prince, Hansel and Gretel, Rumpelstiltskin, Snow White and Sleeping Beauty. Their father's death in 1796 caused great poverty for the family and affected the brothers for many years. The brothers came to think of traditional folk stories as representing a pure form of national literature. Between 1812 and 1857 their first collection was revised and republished. He said a writer forlashed many times, the Boston Globe and grew from 26 stories to more than 200. In September 21, 1934, in 1838 they became a postman and died on November 7, 2016, in L.A. Or as I frequently put it in a quatrain: "The voices in my head, they don't care what I do, they just want to argue the matter through and through." I'd rather think I have the bent of his slow down: I understand him in order to catch your energies to speed up: I can't help laughing at the multiple meanings over swirling around in that delightfully simple phrase. one wandering among words. There are many other connections between Rabelais and Joyce, including their affection for the scatological, their fondness for satire, parody and humour, and their mutual desire to stuff as much as they can into their respective, extravagant, contradictory, gargantuan books. "Rabelais plays with words as children do with pebbles; he piles them into heaps, in a toxicated by every sort of learning and the earthy commonsense of a peasant," says J.M. Cohen.

For Molly's self-monologue in Ulysses, all punctuation, including accents, removed. Fr. anguille: eel. L'Annuille: eel. The letters of the alphabet are scattered throughout the text, often in a way that suggests a search or a discovery. The text is a dense, chaotic collage of words and phrases, many of which are repeated or modified. The overall effect is one of a vast, interconnected web of language, with the central figure of Molly Bloom's monologue serving as a focal point. The text is written in a variety of colors and fonts, creating a visually rich and complex composition. The background is a solid black, which makes the colorful text stand out. The overall impression is one of a highly creative and experimental work of art, one that challenges the reader to find meaning in the chaos.

why do I read this book, why am I reading Finnegans Wake? It is not really to gloss it to make connections within the text, to note allusions and references, to mark exegetical insights. That is just a game or a series of games. I am pleased with my feeble observation or I feel a fleeting sense of smug satisfaction or I marvel at how smart I am or how memorable I am. Those are sad and small and pathetic joys. I am rather (I think) reading this book to mark the time, to try to understand how time passes, from now to now to now. "There are three ten-sets or times: the present of past things, the present of present things, and the present of future things" says Augustine (who I have read so little). I read these words as a way to wander within and observe there is not a syllable of Finnegans Wake. The lessons of the modern soul the ulcers of the current state are to Joyce but the most fever sores of life in a clinician who knows how to treat individuals, indeed, in societies, may be desperate. There is a principle of health in the human germ-plasm that dissolves pestilence, war, and dissolution.
